Important Notes

- All estimates are for Bastrop County / Central Texas area, March 2026.
- "Midpoint" values are used in the permit_tasks tracking system.
- Septic installation (\$15K–\$30K) is the single largest cost — get quotes from multiple licensed installers.
- Water connection fees from Aqua WSC are fixed per their published fee schedule.
- The civil engineer bundle (site plan + drainage + roads) should be negotiated as a single contract.
- Fire suppression requirements should be confirmed with ESD #1 at the pre-development meeting.
- Some costs may be reducible if units share infrastructure (e.g., one water meter serving all 5 units).
