4Ward Land Surveying Team**Re: Request to Update Existing Property Survey — 160 Still Forest Dr, Cedar Creek, TX 78612**

Dear 4Ward Land Surveying Team,

I hope you are doing well.

You previously completed a survey for our property, and we are reaching out because we have made several updates to the site since that original survey was prepared. Specifically, we have added several trailers and shipping containers to the property, and we would like to have these structures reflected on the survey.

Because your team already completed the original survey, we are hoping it may be possible to revise or update the existing drawing rather than start from scratch. Our understanding is that updating the prior survey to show the added structures as improvements or site features may require less field work and drafting time, and therefore could potentially be a more cost-effective process.

Our goal is to move forward with applying to have the property recognized for commercial use in Bastrop County. From what we understand, an updated survey showing all current site improvements will likely be needed before we can proceed with the next steps in the permitting or site development process, which may involve civil engineering review or preparation of a site plan.

Please let us know:

- If updating the original survey is possible
- What information you may need from us about the trailers and containers
- Whether a site visit would be required to locate these structures
- An estimate for the cost and timeline to revise the survey

We would really appreciate the opportunity to continue working with your team since you already have the base survey and familiarity with the property.

Thank you very much for your time, and we look forward to hearing from you.

Best regards,

Rahul Sonnad
